JOHNNY H PAEK CEO / President

Mr. Johnny H. Paek is the Founder and CEO/President of Elite Global Sourcing Inc. (USA), Elite Games Inc. (Korea), Elite Global Sourcing Phil Inc. (Philippines), Elite Games SEA Inc. (Philippines), Elite Games Indonesia Inc. (Indonesia), Elite Games (Thailand) Co. Ltd. (Thailand), and Elite Games Brazil LTDA (Brazil), all of which are wholly owned subsidiaries of Elite Global Sourcing Inc.

Before establishing Elite Global Sourcing Inc., Mr. Paek co-founded Ignited Games Inc., where he served as COO and EVP. His leadership was instrumental in driving sustained profitability and growth by successfully planning, implementing, and achieving key company goals and objectives.

Prior to Ignited Games, Mr. Paek was a founding member of Ndoors Interactive Inc., where he also served as COO and EVP for the U.S. subsidiary of the Korean developer and publisher Ndoors Corporation, which later became a subsidiary of Nexon. Under his guidance, Ndoors launched highly acclaimed MMORPGs like "Atlantica Online" and other successful titles that made a significant impact in the Western hemisphere.

Additionally, Mr. Paek was a founding member of Gravity Interactive, where he held the position of General Manager/CFO for the U.S. subsidiary of Gravity Corporation (NASDAQ: GRVY). At Gravity, he pioneered the business model for game operations and services, contributing to the global success of internationally renowned games such as "Ragnarok Online." Mr. Paek holds a Bachelor's degree in Business Administration from California State University, Fullerton.

ROMULO AUGUSTINE REYES – Managing Director

Mr. Romulo Reyes is responsible for the organization’s operations, business development, corporate strategy, client relations and instigate high performance culture. Romulo joined the company in 2014 and brought with him his extensive experience in different industries such as game development-publishing, business process outsourcing, software development and mobile telecommunications.

Prior to joining Elite, he has served as COO for Optivetech Corp., General Manager for Gamebowl Inc., Business Development Manager for Cosmic Technologies Inc. (Cherry Mobile) and Operations Manager for Convergys Philippines Inc. Romulo earned his Development Communication degree from the University of the Philippines Los Banos.

JUNGHO KIM – Head of Operations and Strategy

Mr. JungHo Kim has been with Elite Global Sourcing since March 2018, serving as the Head of Operations and Strategy. In this capacity, he is pivotal in actualizing the company's vision and mission, ensuring that all client service commitments are fulfilled with the highest standards of excellence.

Mr. Kim oversees multiple operations teams, emphasizing a consumer-centric approach and consistently surpassing departmental objectives. His expertise spans a wide suite of game service verticals, including customer support, quality assurance, game management, community management, social media management, localization, on-ground events, marketing, sales, e-commerce, and digital advertising for titles across all gaming platforms such as consoles, PC, and mobile. He excels in balancing customer support strategies with effective delivery, and he is proficient in people management, performance management, customer experience, and talent development. He earned his degree in Politics & Economics from Kook-Min University and previously served as a Director and Principal Instructor at a major educational institution in Korea from 2014 to 2018.

JONG KI YOO – Head of Business Development

Mr. Jong Ki Yu is the head of the Business Development Department at Elite Games Inc (Korea). In his current role, he oversees General Service Management, which encompasses a wide array of responsibilities such as Business Development and Sales, Client Relations Management, Inter-branch Liaison and Coordination, and the strategic planning of various new business ventures. His leadership ensures that all facets of the department function smoothly and efficiently, driving the company towards continued growth and success.

Prior to his tenure at Elite Games, Mr. Yu garnered extensive experience in the gaming industry. He was instrumental in managing the Korean PC cafe business at Nexon, where he honed his skills in overseeing large-scale operations and developing innovative strategies to enhance user engagement and satisfaction. Additionally, he played a pivotal role in the VR business at Smilegate, showcasing his versatility and ability to adapt to emerging technologies and market trends.

GARY BERBA – Senior Product Manager / Special Advisor

Mr. Ramon Gerardo Berba is responsible for overseeing product lifecycle management, driving product innovation, aligning product strategies with market needs, and ensuring optimal product performance. Ramon joined the company in 2016 and brought with him his extensive experience in sectors such as game management, customer support, game operations, and community management.

Prior to joining the company, he served in various roles at Level Up Games for nine years, including Member of Management Committee, Member of the Executive Committee, Game Operations Manager, Product Manager, Brand Group Head, Brand Manager, and Lead Community Manager. Additionally, he held multiple analytical positions over a decade at United Coconut Planters Bank, including Area Office Operations Analyst, Branch Banking Analyst, Corporate Services Analyst, Corporate Planning Analyst, Productivity Services Analyst, and Member of the re-engineering team. Ramon earned his Management degree, graduating Cum Laude, from the International Academy of Management and Economics.

TEST RESULT

- Receive Patch Content and Notes as Test Package.
- Read and analyze the package information.
- Proofread and modify by information from Patch Notes if needed and inform the client's counterpart.
- PM will send the final notes to the team by posting it in a thread under Maintenance on official Team Messenger.

PRE-TESTING PROCEDURE

- Receive the notes in the Maintenance thread on Team Messenger.
- Review the notes.
- Check the schedule and work arrangement given by the PM in the thread.
- Wait for the maintenance schedule.

MAINTENANCE TESTING PROCEDURE

- During maintenance day, post an in-game notice (Permanent Notice) in-game 30 minutes before it starts.
- Take a screenshot of the announcement in-game.
- Send the screenshot to the client via Team Messenger.
- Once maintenance starts, take a screenshot of the message in the game.
- Send the screenshot to the client via Team Messenger to confirm that the server is down.

REGULAR TESTING UPDATES/CONTENT

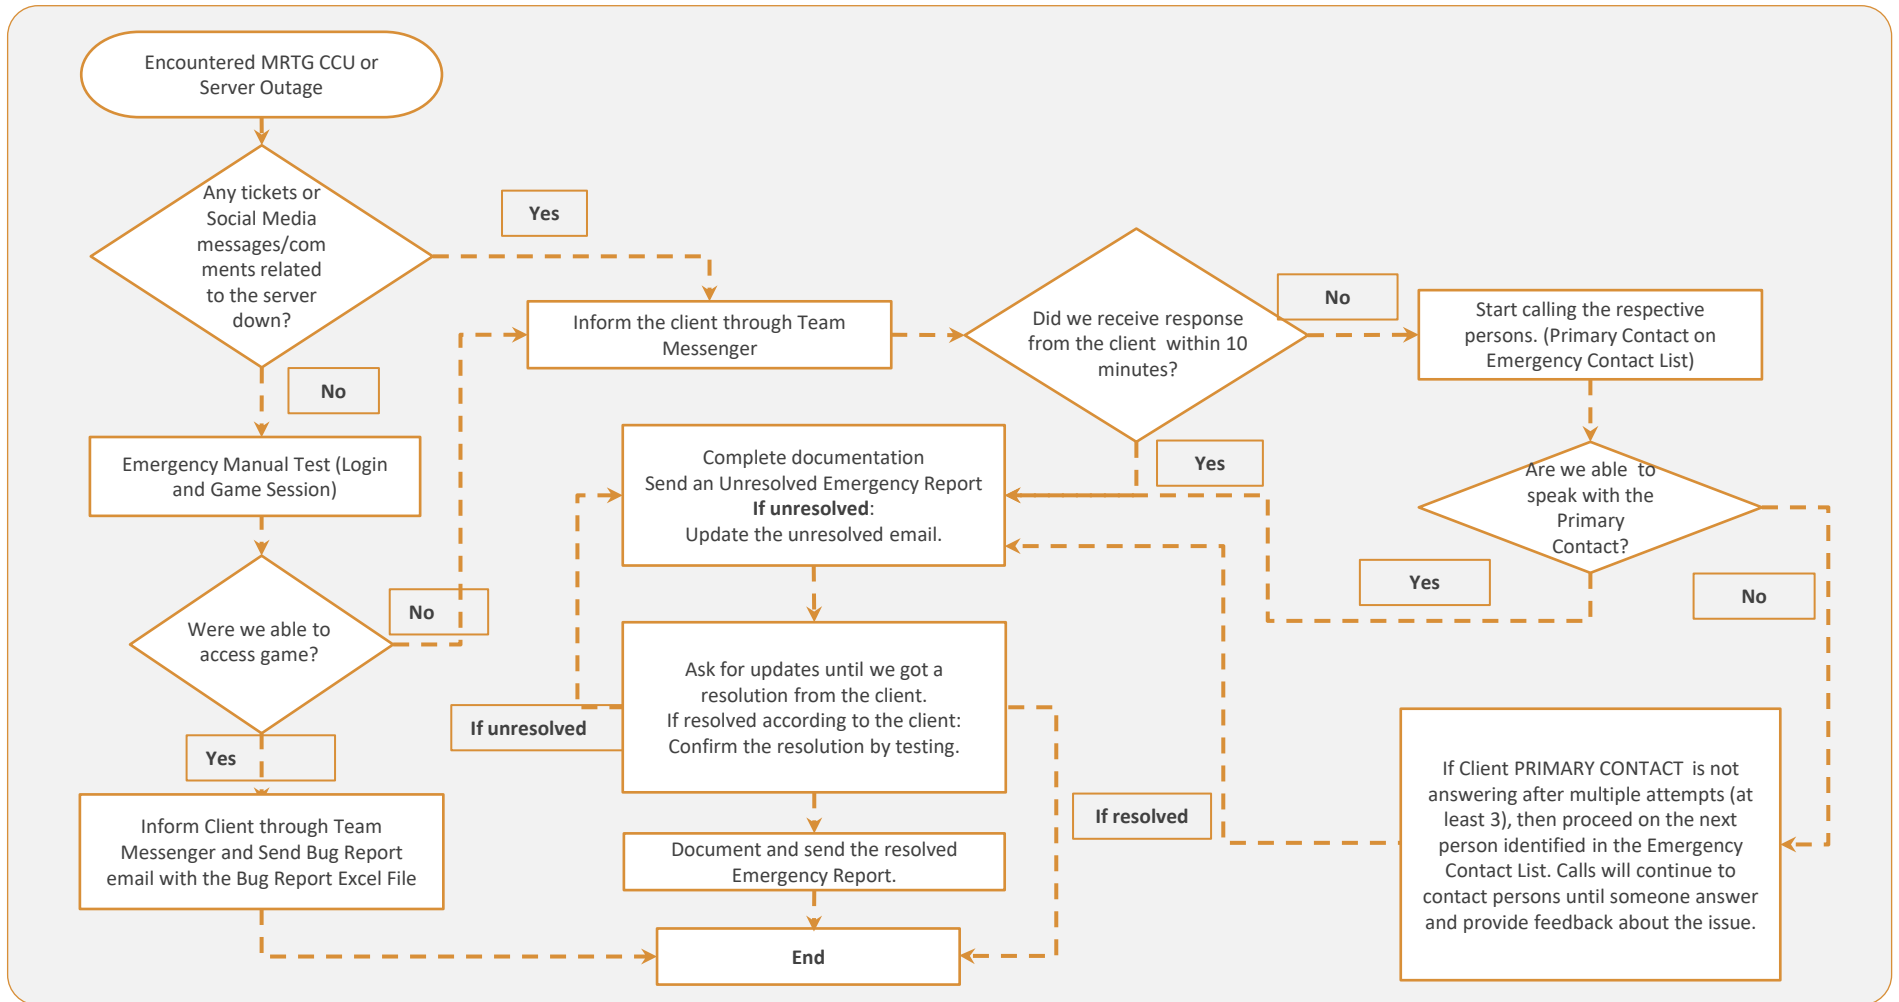

- Attendance – Login and check if you get the active content updates, assets and new items/rewards.
- New Items – Check the price of the new items and if the tag is correct (Tag: NEW)
- Hot Items – Check the price of the hot items and if the tag is correct (Tag: HOT)
- Removed Items – Check if the removed items are gone.
- Map Boost – Play and check if the boost (Active Boosts like EXP or drops) is working in the specified map according to the MA notes.
- Weapon Boost – Use the item with a boost for that day and see if the weapon boost is working (Points Boost and EXP boost). PM will send the item to the test account.
- Events – Check if see the declared events in the MA notes is working. Events may vary depending on the mechanics. Example: Mission, Time Bonus etc.
- Top Up Testing – By request of the client, PM will test the lowest amount of top up in selected Payment Gateways. Check if the Top Up amount will reflect in-game.
- Item Purchase Testing - By request of the client, PM will purchase an item inside the game using the currency you top up previously. Items to be purchased may be any or as mentioned by the client.
- Banners Testing – Check if the link of all banners (Main Website Banner, Launcher, and In-Game Banner) is pointing to the right notice.

ENDING THE TEST

- For Regular testing, PM will inform the client through Team Messenger that each point of testing are working by sending a message of confirmation with a proper screenshot for proof right after of each test.
- Once the testing is done, PM will confirm that the team is done with the test.
- Wait for the client to confirm and wait for the opening of server announcement by the client.

POST MAINTENANCE

- Wait for the announcement from the client.
- Once announced, confirm that the server is open to the client by sending a screenshot in the lobby showing that players created a room in the game.
- Change and update the in-game notices using the provided announcement tool
- Send Notification across identified channels that the server is open.
- Post that the server is open in the thread on Team Messenger.
- PM will communicate with client with the final confirmation of all Maintenance activities that had been complied with through Team Messenger
- PM will then create the MA Postmortem Report and submit it on or before agreed upon cutoff of MA reports on the same day,

SERVICE OVERVIEW : COMMUNITY MANAGEMENT

- ❑ ELITE's community management expertise results to an accurate picture of user's needs, preferences and concerns. Consequently, the organization is well-guided in making significant business decisions that would impact not only the organization, but the entire gaming community.
- ❑ ELITE represents your organization and interact with the community, according to your company's image and directives. This is imperative as we function as the voice between you and your players and communicate their concerns directly to you.

CONTENT CREATION

CONTENT PLANNING

- Develop a comprehensive content calendar with post schedules and topics.
- Prioritize content based on relevance and importance.
- Set clear objectives for each post and its role in the overall strategy.

VISUAL ASSETS

- Create, source, or design high-quality visual content, including images, graphics, videos, and animations.
- Ensure all visual assets align with the product's branding and message.
- Maintain a media library for easy access to visuals.

HASHTAGS AND KEYWORDS

- Conduct thorough research to identify and employ relevant hashtags and keywords for content optimization.
- Boost discoverability and engagement through appropriate tags and keywords.
- Stay updated on trending industry keywords and adapt content accordingly.

CONTENT LOCALIZATION

- Translate and adapt content for different language markets.
- Ensure that localized content is culturally appropriate and relevant.
- Localize visual assets, such as graphics and images, for different regions.

CONTENT DISTRIBUTION STRATEGY

- Develop a clear strategy for distributing content across various platforms and channels.
- Plan content release schedules and consider time zones and peak engagement periods.
- Diversify distribution to reach a wider and more diverse audience.

COMMUNITY EVENTS

EVENT IDEATION AND PLANNING

- Brainstorm and plan new events, challenges, and contests.
- Define event objectives, target audience, and desired outcomes.
- Create event concepts and themes.

COMMUNICATION STRATEGY

- Develop a communication plan to inform the community about the event.
- Decide on the messaging and content for event promotion.
- Communicate important event details and updates.

PROGRESS TRACKING

- Monitor the progress and performance of event participants.
- Keep track of achievements, points, or milestones reached during the event.
- Provide real-time progress updates to participants.

POST-EVENT WRAP-UP

- Conduct a thorough review and evaluation of the event.
- Gather feedback from participants and assess event performance.
- Close the event and announce winners and results.

INFLUENCERS COLLABORATION AND COORDINATION

INFLUENCER RESEARCH

- Identify potential influencers based on their niche, audience, and alignment with the product or brand.
- Evaluate the influencer's credibility, reputation, and engagement metrics.
- Create a list of potential influencers for collaboration.

PARTNERSHIP OUTREACH

- Reach out to identified influencers and initiate collaboration discussions.
- Craft personalized outreach messages and proposals.
- Establish initial contact and gauge interest.

INFLUENCER CONTRACT NEGOTIATION

- Negotiate terms, compensation, and expectations with influencers.
- Draft clear contracts specifying deliverables, timelines, and payment structures.
- Ensure legal compliance and mutual understanding.

AUDIENCE INSIGHTS UTILIZATION

- Leverage influencer insights on audience preferences.
- Apply audience insights to refine product development, marketing, and community engagement strategies.
- Personalize content and promotions based on influencer-driven audience data.

COMMUNITY AND PLAYER MARKET MONITORING AND TREND ANALYSIS

SENTIMENT ANALYSIS

- Analyze community sentiment to understand user emotions and attitudes.
- Use sentiment analysis tools to categorize and assess the tone of feedback.
- Identify shifts in sentiment and respond accordingly.

COMMUNITY DYNAMICS

- Observe and understand the dynamics and interactions within the community.
- Recognize influential community members and key contributors.
- Promote positive community dynamics and resolve conflicts when necessary.

USER EXPERIENCE ENHANCEMENTS

- Continuously work on improving the overall user experience based on feedback.
- Identify pain points and areas of improvement for product or community features.
- Implement changes to enhance user satisfaction.

FEEDBACK HISTORY AND TRENDS ANALYSIS

- Analyze the historical data of community feedback to identify recurring themes and trends.
- Understand how user priorities and concerns have evolved over time.
- Anticipate future needs and improvements based on feedback history.

ANALYSIS AND REPORTING

SERVICE OVERVIEW : QUALITY ASSURANCE

- ❑ The correlation between a well-managed game and a high-quality product is strongly influenced by a solid QA process. This is one of the core foundations upon which your player community will base their opinions of your game. ELITE offers tailored Quality Assurance as part of its Standard Game Service, customized to meet the specific needs and requirements of your organization for users' better gaming experience.
- ❑ ELITE possesses extensive experience and a skilled QA workforce across various domains, including gaming, web development, VR, and e-commerce. We are actively advancing our testing capabilities through the implementation of technology-based testing enhancements, such as test automation and solutions.
- ❑ Our specialized QA team and Language specialists thoroughly tests gameplay mechanics, graphics, audio, and functionality to identify and resolve bugs, glitches, and performance issues. Using a combination of manual, Toolkits, and automated testing methods, they strive to achieve seamless gameplay across different platforms, enhancing user satisfaction and the game's market competitiveness.
- ❑ ELITE possesses extensive experience in various domains such as gaming, web, VR, and e-commerce, along with skilled personnel, and is currently advancing technology-based testing, including test automation and solution implementation.

✓ Functionality Testing (update verification, local account billing testing, etc.)

✓ API Validation

✓ FGT (Focus Group Testing)

✓ Blockchain and Metaverse Validation

✓ L10N / I18N QA

✓ Compatibility Testing (Mobile Device, PC)

✓ Usability Testing (UI/UX, etc)

✓ SQL query testing

✓ Ad Hoc Testing

✓ Web, Mobile App, and Web App Testing

QUALITY ASSURANCE : QUALITY ASSURANCE WORK PROCESS

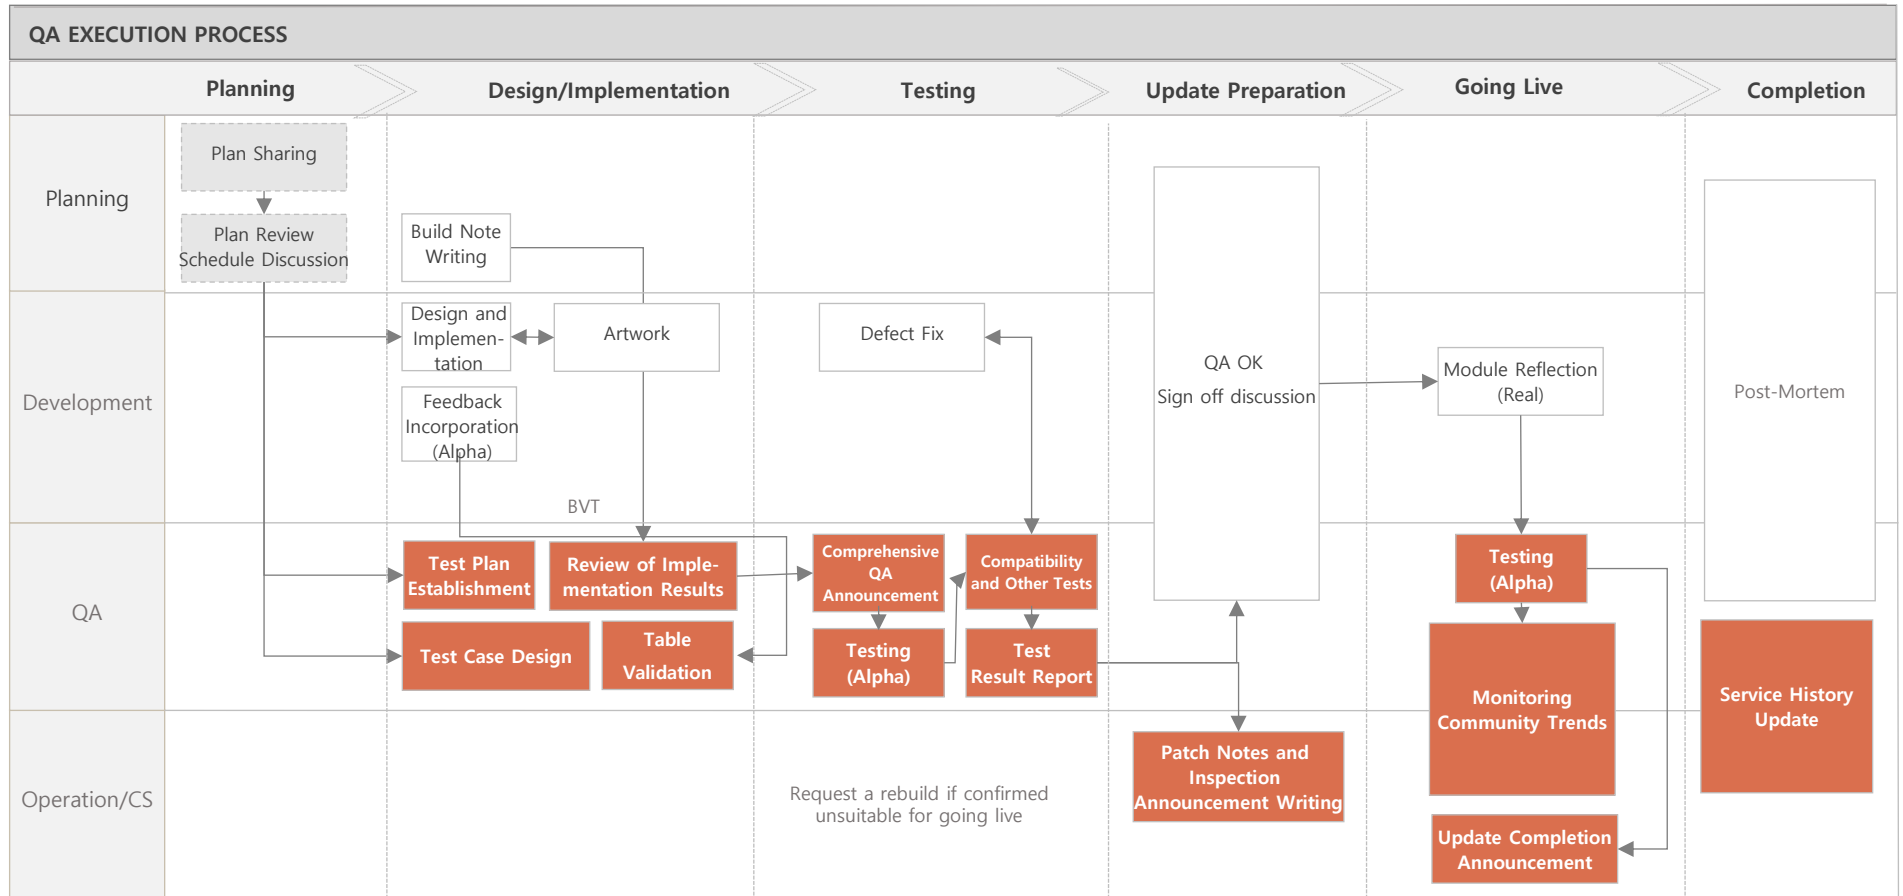

- The roles and responsibilities of the client and our company can be structured as follows for each stage of development. Please note that this is flexible and may vary depending on the client's organization and circumstances.

		Planning Stage	Development and Design Stage				Testing Stage	Live		
Key Activities by Organization	PM	Setting the testing schedule and scope		Communication channels and response to issues during testing						
	Client's Dev (Planning/Development)	Planning review	Response to test queries	Support for cheat functionality and operational tool development		Test Case Review	Defect Correction	Build Extraction and Defect Correction	Setting up the test environment for inspection (e.g., bypass access during inspection)	
	ELITEGAMES	Identification of Test Items	Establishing a Test Plan and Prioritization	Build Test Environment	Perform Editor-based Daily Unit Testing	Design and Maintain Test Cases	Validate Balancing and Benchmark Against Other Games	Quick Scan Test (such as BVT)	Device Compatibility Testing	Response to Inspections and Test Account Management (e.g., account deletion)
			Validate Data Tables				Comprehensive Functional Testing	Client Performance & Security Testing	Monitoring and User-Reported Defect duplication After Update	
	Building BTS (Build-Test-Support) and Designing and Supporting Test Automation for BVT and Regression Areas									
	Establishing and Improving the Test Process									
	Communication and Regular Reporting (Weekly/Monthly/Update Cycle Issue Reporting, Test Results Reporting, Sign-Off)									
	Key Deliverables	Planning Review Report	Test Plan	Test Cases	Test Environment	Unit Testing Defect Report	Risk Analysis Report	Non-Functional Test Results	Test Execution Result Report (sign-off)	Monitoring and Store Policy Checklist

- Lessons learned
- Expertise in identifying key weak points and defect types by genre is crucial for achieving rapid test results.
 - Avoid overloading clients with excessive documentation demands and rigid schedules; a flexible testing toolkit is essential.
 - Since most reviewers responsible for outsourcing and evaluating deliverables are not QA specialists, providing intuitive reports that allow readers to quickly understand the issues is important.

QUALITY ASSURANCE : QUALITY ASSURANCE EXECUTION PROCESS

- The typical testing process generally proceeds as follows. Please note that it can be flexibly adjusted depending on the client's organization and specific circumstances.

□ We have extensive experience and expertise in executing diverse projects for a wide range of clients. Additionally, our comprehensive reports and testing toolkits allow us to start work promptly without the need for extensive preparation time or planning documents, enabling us to achieve quick results.

3. 젠크스 Maven PMD Findbugs 사용하기

젠크스에서 Maven으로 PMD와 Findbugs를 사용하기 위해서는 젠크스의 빌드설정과 pom.xml파일의 작성이 필요하다.

3.1 젠크스 빌드 설정

젠크스 빌드 설정을 위해서는 프로젝트 페이지에서 구성을 클릭한다. 그다음 Build 항목으로 이동하여 Add build step -> Invoke top-level Maven targets를 클릭하고 Goals에 pmd와 findbugs 명령을 입력한다.

PMD에서 사용할 수 있는 Goal은 아래와 같다. 필요한 목적에 따라 추가해서 사용하면 된다.

Weekly Elite Global Sourcing Recommendations

- With the current day to day increase of 8,000 average DAU, new servers are needed to be launched for NA and EU for stability. Most guild chatter the top 10 percentile of guilds manage to avoid a lack of farm spots to utilize due to the volume. The instanced zones need to be increasing by adding more game servers for new players since there is overcrowding in the original server.
- Patch 3.24b is highly anticipated by the community with a current tracking figure of 32.7% engagement of the total SNS/Community activity outside of the game. The anticipated features of players would be the following:
 - 2a. Flight System
 - 2b. New World PvP Zone - Heals
 - 2c. Buffs for the Warrior Class Talent "Snare": Out of the top 50 Warrior players (based on item level), 42 have posted in the forums of their excitement regarding the additional 10% slow on top of the 40%. Currently, the player community feels that the Warrior cannot sustain mobility against classes with more utilities such as Mages, Rangers and Druids.
- Internal NPS Scoring for Game Content Experience Results show heavy positive tracking for World PvP Boss Encounters. External positive engagement rates show a higher than average interest and satisfaction with the recently released Dan the Destroyer/World PvP Map Boss at 15% total engagement (positive versus all other community activities in all SNS platforms). Guild participation shows a 45% new versus Guild DU for the day with the rest of the 55% spread across leveling, crafting, dungeon crawl, farming for materials and other regular content for progression. Guild growth across top, medium and low tier parties are on the rise mainly due to playerbase since the boss requires a minimum of 200 players to take down. This initiative and active trend of guilds may have contributed to the relatively low churn rate of new users (currently at 2.2%) with an average playing time of 4 hours per day. Peak volume of identified guild members for all tiers also show highest logins during the Dan The Destroyer event.

Game Content Experience Results

Content	Positive	Neutral	Negative
New World Boss added from the Destroyer/World PvP Map Boss (Patch 3.1 Month)	45	5	10

Narrative Feedback

Positive:

- Players are happy that they will finally be able to get the new world boss item. The Dan boss was great!
- But some users find the furniture experience inconsistent. However, an even 50-50/50 could be ideal.
- Players say they are not yet ready to fight the world boss and all of what they get before equipment.

Negative:

- Low and mobile users are upset because when they go to the world boss or large PvP maps, it is very laggy due to high number of players in the area.

Suggestion:

- Game Optimization is a huge concern for current players especially high traffic areas. Scaling of resources to meet reactions and some sports management for things may be applied. Copying of their Content may also be critical but extensive user testing and feedback must be done as well during world PvP. The players do not have a detested experience.
- We do not recommend going out has entertainment terms to improve users item sets are able to ensure that the players are not crowded during the world boss appearance.

Overall Content Score

Content	Positive	Neutral	Negative
Happy Halloween Boss Combats (Limited OP Servers Release)	10	10	20

Narrative Feedback

Players say that the costume looks great on the website.

Players who purchased the costume using promo codes instead of the game item shop currency are dissatisfied because the contents were the warrior costumes instead if they purchased it using promo codes.

Suggestion:

- Create a consolidated database batch post comparison of which costume and deletion of received warrior costume for promo code users. We will manually edit/delete the users costumes if they contact us as customer support.

KEY PERFORMANCE INDICATORS (KPIs)

We Measure for Success!

H. James Harrington once said; “Measurement is the first step that leads to control and eventually to improvement. If you can’t measure something, you can’t understand it. If you can’t understand it, you can’t control it. If you can’t control it, you can’t improve it.”

ELITE believes that one of the key drivers of success is understanding what we do and improving how we do it. By partnering with us, clients can create meaningful player experiences and provide a better bottom line through effective services management.

PROFESSIONAL PARTNERS

- ❑ ELITE has been providing top-notch services to various global game publishers and operators to ensure the success of their projects.

“ I am very happy with the personalized service, quality of work and dedication that Elite Global Sourcing brings to the table. They have helped us increase the quality of our customer service, bringing our service offering to the next level. It is quite impressive. Partnering with Elite has proven to be an efficient, flexible, cost-effective solution to meet our customer service needs. Their contributions to our Operations has proven to be invaluable. They have clearly demonstrated their commitment to reliability and quality in providing outstanding services to our customer.”

Thor Biafore

Head of Customer Support, Krafton En Masse (formerly Global Director of CS / Blizzard Ent.)

“Working with ELITE has allowed us to offer fantastic customer service in the gaming industry anytime, anywhere! In five years of working with ELITE, our expectations of timely responses to customers, in-game support and community involvement through social media has been met and exceeded. As the social media craze has evolved, so has ELITE! With their 24/7 support, they have been able to assist us in all of our customer service and community needs. Most of all, they are very professional and a delightful company to work with. There are always positive vibes coming from ELITE and they will do their best to assist the company's needs and ensure player satisfaction. “

Garrett Cecchini

CS & UX Manager, Gravity Interactive Inc

“I want to congratulate the whole team on a job well done escalating recent technical issues, doing the investigative work on the problems and also providing us with the information and data to help provide a clear picture to the leadership and the product team here at our company. You are demonstrating how to provide Customer Excellence! A job well done team, well done!”

Jennifer Kim

CX Manager, JOYCITY Corp

Thank You and We Look Forward To Working With Your Company!
